- Microsoft SQL Server Management Studio
- Figma
- n8n

About Me

Final-year Applied Computing student with experience developing and maintaining full-stack web applications in a professional environment. Skilled in PHP, JavaScript, ReactJS, Python, SQL, and MySQL, with experience delivering end-to-end features, troubleshooting production issues, and collaborating across teams to build effective solutions. A proactive and adaptable problem solver with a strong sense of ownership and a passion for software development.

Experience

Mindflex Education | Web Developer Intern

Feb 2025 - Present

- Designed, developed, tested, and supported deployment of web application features end-to-end, including database schema planning, application logic implementation, and production release.
- Built and maintained an account transaction system that reconciles administrative transaction records with bank transaction data to improve financial tracking accuracy.
- Developed and enhanced internal administrative systems, implementing new workflows and updating existing features to align with evolving business requirements.
- Created scripts to automate data updates and streamline database maintenance processes.
- Investigated, debugged, and resolved issues across administrative systems and user-reported application complaints, improving overall system reliability and user experience.
- Took ownership of existing features developed by other team members, working effectively with legacy codebases to implement enhancements and complete feature deliveries.
- Introduced reusable components and advocated for improvements in development practices, increasing maintainability and development efficiency.
- Collaborated closely with cross-functional stakeholders and team members to deliver solutions aligned with business needs.
- Mentored and onboarded newer interns by providing technical guidance, knowledge sharing, and support during project integration.

Singtel | Snr Associate Engineer

Oct 2023 - May 2024

- Leveraging on SQL and PySpark for data mining and analysis, consistently delivering results for ad hoc requests 1-2 days ahead of deadlines.
 - Collaborated in preparing data-driven PowerPoint presentations, ensuring accurate and timely reporting for executive reviews.
-

Certificates

- Cloud Architecting and Security
