- Figma
- n8n

About Me

A Final-year Applied Computing student with a strong foundation in software development and hands-on experience through academic projects and professional internships. A quick learner with strong problem-solving and communication skills, adaptable to new technologies, and committed to delivering high-quality solutions. Seeking opportunities to apply my technical knowledge, contribute to a collaborative team, and continue growing as a technology professional.

Experience

Mindflex Education | Web Developer Intern

Feb 2025 - Present

- Developed, tested, and deployed full-stack web application features end-to-end, including database design, backend logic, and production release.
- Built and maintained an account transaction reconciliation system integrating administrative and bank data to improve financial accuracy.
- Enhanced internal administrative systems by implementing new workflows and improving existing features based on evolving business requirements.
- Created automation scripts for data updates and database maintenance, reducing manual workload.
- Debugged and resolved system issues and user-reported bugs, improving overall application stability and user experience.
- Worked with legacy codebases, taking ownership of existing features and delivering enhancements and improvements.
- Improved code maintainability by introducing reusable components and promoting better development practices.
- Collaborated with cross-functional teams to deliver solutions aligned with business needs.
- Mentored and onboarded junior interns by providing technical guidance and support.

Singtel | Snr Associate Engineer

Oct 2023 - May 2024

- Leveraging on SQL and PySpark for data mining and analysis, consistently delivering results for ad hoc requests 1-2 days ahead of deadlines.
- Collaborated in preparing data-driven PowerPoint presentations, ensuring accurate and timely reporting for executive reviews.
